

Program: Poster presentations, Alphabetic list

Name	Location	Title of contribution	#
Bo Albinsson	Göteborg S	Self-Assembled DNA Nanosystems for Energy and Electron Transfer Applications	P55
Numan Almonasy	Pardubice CZ	Model compounds for the study of excitation energy transfer	P1
Magnus Bälter	Göteborg S	Photocontrolled Energy Transfer on a DNA-scaffold	P56
Jenny Blechinger	Erlangen D	Catalytic, photochemical reactions templated by nucleic acids and controlled by visible light	P57
Oleg Borodin	Kharkiv UA	Novel fluorescent probe for viscosity monitoring: 2,5-bis[2-(5-phenyl-1,3-oxazol-2-yl)phenyl]-1,3,4-oxadiazole	P21
Sylvia Braslavsky	Mülheim D	Fluorescence self quenching and triplet state generation of dyes in constrained media	P9
Valentina Cantatore	Pisa I	Simulation of the Photoisomerization in Self Assembled Monolayers of Azobenzene Derivatives	P50
Zsuzsanna Czibulya	Pécs H	The effect of metal ions on the interaction of a cavitand derivative with caffeic acid presented in red wines	P25
Martin Danko	Bratislava SK	Spectral studies of Bithiophene Derivatives with Carbonyl Substitution	P10
Melanie Denißen	Düsseldorf D	Synthesis and Photophysical Properties of Oxindole-Merocyanine-Dyades	P11
Lenka Filipová	Brno CZ	Synthesis and Study of Photoresponsible Amphiphiles Containing the Azobenzene Moiety	P12
Lajos Fodor	Veszprém H	Influence of polycyclic aromatic hydrocarbons on the luminescence of water	P22
Lajos Fodor	Veszprém H	Unusual dual luminescence of tetracyano-polypyridyl ruthenate(II) complexes	P24
Melinda Fodor	Veszprém H	Photochemical properties of water-soluble manganese(III) and cobalt(III) porphyrins in homogeneous and microheterogeneous systems	P26
Alexandre Fürstenberg	Geneva CH	Improved fluorescence super-resolution imaging in heavy water	P18
Hao Hoang Minh	Graz A	Exciplex formation and its dependence on free energy studied by time-resolved magnetic field effects	P2
Ottó Horváth	Veszprém H	Singlet-2 fluorescence of porphyrins; the effects of the metal center on this rare type of emission	P27
Muhammad Imram	Veszprém H	Photophysical and photochemical investigation of water-soluble, anionic cerium(III) porphyrins	P28
Stefanie Jung	Düsseldorf D	Sensitized Photolysis of o-Nitrobenzyl-Compounds	P3
Axel Kahnt	Erlangen D	A corrole–azafullerene dyad: photoinduced charge separation	P4
Christoph Kerzig	Halle D	Near UV-Photoionization of Anthrol Derivatives in Aqueous Solution	P5
Petr Klán	Brno CZ	Development of New Fluorescent Probes	P39

Ján Krausko	Brno CZ	Prompt ISC from higher excited states of the anion of p-hydroxyacetophenone	P13
Dongkeun Lee	Daejeon KOR	Nanoviscosity effect of G-quadruplex using Fluorescence Correlation Spectroscopy	P58
Lucilla Levi	Düsseldorf D	Phenothiazine based merocyanine chromophores for DSSCs	P40
Christian Ley	Mulhouse F	Photocyclic radical generator for efficient light conversion into chemical energy: a mechanistic and computational study	P41
Yin Li	Pécs H	Fluorescence quenching studies on interactions of a novel deepened cavitand towards some transition metal cations and neutral guest	P29
Benjamin März	Munich D	On the speed limit of photoswitches at the example HTI	P42
Leo Mandić	Zagreb HR	Photodecarboxylation of different aminoadamantane carboxylic acids activated by phthalimides	P6
Christel Marian	Düsseldorf D	On the Photophysics of Rhodamine Dyes	P51
Gergely Matisz	Pécs H	Theoretical modelling on the interaction of a crown ether with K ⁺ ion based on calculated and experimental Raman spectra	P52
Mathias Micheel	Düsseldorf D	Hydrogen abstraction by 2(1H)-pyrimidinones: Another channel for secondary photochemistry of DNA photolyses?	P59
Kim Minjung	Daejeon KOR	Study of the interaction between G-quadruplexes and polyethylene glycols using fluorescence correlation spectroscopy	P60
Zsolt Miskolczy	Budapest H	Dual fluorescence and inclusion complex formation of 6-methoxy-1-methylquinolinium with cucurbit[7]uril	P45
Ramona Mundt	Düsseldorf D	On the Fluorescent Trails of a Chimera	P61
A. Datta Nancy	Bombay IND	“Restriction in Rotation” in Auramine O in Dehydrated Cation Exchanged Nafion Membrane	P46
Robert Naumann	Halle D	Photoionization of [Ru(bpy) ₃] ²⁺ : Generation of Hydrated Electrons via a Novel Green Light-Driven Catalytic Cycle	P30
Oleksii Nevskyi	Konstanz D	Three-Dimensional Diffusion of Single Molecules in Thin Polymer Films	P23
Jesper Nilsson	Göteborg S	Spiropyran photoswitches – Characterization studies of thermal, acid-, and light-induced processes in aqueous media	P14
Beata Peles-Lemli	Pécs H	The complexity of the solvation mechanisms of aniline – single-walled carbon nanotube in alcoholic solvents	P32
Beata Peles-Lemli	Pécs H	The electric field induced charge transfer during interactions of alkali metal ions with graphene layers	P34
Alexander Ponyaev	St. Petersburg RUS	Photolysis of ortho-nitro-methyl-benzimidazoles	P15
Alexander Ponyaev	St. Petersburg RUS	Photochromism of ortho-nitro-methyl-benzothiazoles	P17

Jean-Luc Pozzo	Talence F	Design of molecular nonlinear optical switches	P47
Charlotte Remy	Cachan F	Synthesis and photophysical studies of Calix[6]arene-based fluorescent receptors	P48
Sabine Richert	Oxford UK	Pulsed EPR and ENDOR Study on Triplet State Delocalisation in Supramolecular Porphyrin Nanostructures	P35
Michal Rode	Warsaw PL	Effect of chemical substitutions on photo-switching properties of 3-hydroxy-picolinic acid studied by ab initio methods	P49
Györgyi Secenji	Pécs H	Temperature – dependent quenching of fluorescence of a cavitand derivative with copper ions	P31
Jung Seokhyun	Daejeon KOR	Dynamic quenching of rhodamine 110 using time correlated single photon counting	P7
D. K. Sharma	Bombay IND	Spectrally Resolved Optical Microscopy using a Transmission Grating Spectrograph: Importance of Spatial Selection	P19
Đani Škalamera	Zagreb HR	Photochemical generation of long-lived quinone methides by deamination of p-cresol derivatives	P8
Jens Sobek	Zurich CH	Single Molecule Interactions Studied by Misusing a Commercial DNA Sequencer: A Comparison with Surface Plasmon Resonance	P20
Andrzej L. Sobolewski	Warsaw PL	New paradigms in the photophysics of hydrogen-bonded molecular systems	P53
Péter Szabó	Veszprém H	The dynamics of the reaction of hydrogen atoms with electronically excited O ₂ molecules	P54
Erzsébet Szabó-Bárdos	Veszprém H	Degradation of a nonionic detergent by combination of advanced oxidation procedures	P36
Erzsébet Szabó-Bárdos	Veszprém H	Titanium dioxide mediated photocatalytic mineralization of anionic surfactants combined with ozonation	P38
Torben Villnow	Düsseldorf D	The Chimeric Behavior of Photoexcited Thioxanthone	P16
Arne Visscher	Göttingen D	New Acridinyl Amines as Potential Chemosensors	P43
Dragana Vuk	Zagreb HR	Synthesis and photochemical transformations of new chloro-substituted butadiene chromophores	P37
Sebastian Wandtke	Göttingen D	Fluorescence Sensing Properties of 9-Anthraceneimines	P44
Alexander Wankmüller	Graz A	Magnetic Field Effect on Delayed Fluorescence in Organic Systems	P63
Muhammad Zahid	Graz A	Photophysics of cyano-substituted hydroquinones in different solvents	P62
Björn Zyska	Berlin D	Light-controlled charge transport modulation of SWCNTs	P33
